1	submitted in this case?	1	longitudinal study looking at children who are
2	A. Yes.	2	prepubertal and their mental health over time and
3	Q. And do you have any corrections or updates	3	also their trajectories over time.
4	to it?	4	Q. When you say "trajectory," what do you mean
5	A. There are a handful of additional seminars	5	by that?
6	and lectures that I've given, as well as two	6	A. Just how they grow up, what happens to them
7	additional manuscripts that should be added to this.	7	as they move into adolescence.
8	I can provide that later.	8	Q. And specifically do you mean their the
9	Q. What are the topics of the manuscripts?	9	gender identity trajectory?
10	A. So the first one is a protocol for another	10	A. Yes. Their gender expression, their gender
11	study that I am a co-investigator on, that is about	11	identity, their mental health.
12 13	younger pre-pubertal trans and gender diverse youth, children.	12 13	Q. And when you're measuring their mental
14	And then the second one is another	14	health outcomes over time, are you measuring that in light of any particular intervention?
15	manuscript that comes from oh, no. That one's on	15	A. No.
16	here.	16	Q. Do you consider social transition an
17	Hold on a second. Let me try and remember	17	intervention?
18	it.	18	MR. SELDIN: Object to form.
19	I don't remember what the other one is, but	19	THE WITNESS: I don't know the answer to
20	I can get that one as well.	20	that in this case. I think that in general, social
21	Q. And the first one you mentioned regarding	21	transition is an intervention.
22	the protocol for gender incongruence in children, can	22	BY MR. RAMER:
23	you explain a little bit more what that's about.	23	Q. And when you say you don't know the answer
24	A. So this is another multisite study that I'm	24	to that in this case, what do you mean by that?
25	a part of. And that study is a prospective	25	A. I am not certain if everybody who started
	7 10		5 10
_	Page 12		Page 13
1	was socially transitioned at the beginning. And so	1	page 4, paragraph 18.
2	as an intervention that happens over the course of	2 3	The first case listed here is Noe v Parson
4	time, I don't I just don't know. Q. And so, in other words, in the study that	4	in Missouri state court; correct? A. Yes.
5	we're discussing, that is not a variable that's	5	MR. RAMER: I'm handing the court reporter a
6	counted for; is that right?	6	document I'll ask to be marked as Olson-Kennedy
7	MR. SELDIN: Objection. Misstates	7	Exhibit 2.
8	testimony.	8	(Deposition Exhibit 2 was marked for
9	THE WITNESS: It's an observational study,	9	identification by the court reporter.)
10	so it's not an intervention study.	10	THE WITNESS: Thank you.
11	BY MR. RAMER:	11	BY MR. RAMER:
12	Q. As part of this study, are you recording	12	Q. And, Dr. Olson-Kennedy, is this the
13	whether the subjects were socially transitioned?	13	transcript of your deposition in Noe v Parson?
14	A. Yes.	14	A. I would have to look through the whole thing
15	MR. SELDIN: Object to form.	15	to make sure.
16	THE WITNESS: Yes.	16	Would you like me to do that?
17	BY MR. RAMER:	17	Q. Does it appear to be the deposition of
18	Q. And has that protocol been published?	18	your excuse me the transcript of your
19 20	A. That's the protocol paper that I'm talking about.	19 20	deposition in Noe v Parson? A. Yes.
21	Q. And so it has not been published.	21	MR. RAMER: Now I'm handing the court
	A. It has been published. It's missing off my	22	reporter a document I'll ask be marked as
22	11. It has occur published. It's Hilssilly OH HIV		Olson-Kennedy 3.

The statement if its meaning early social transition causes gender dysphoria in adolescence, I do not agree with that. Do I agree that it's a factor? I do. Q. What is the difference between something being a factor and something being part of a cause? A. I don't think that social transition in childhood leads to a transgender identity in adolescence. I think that for the most part and again, this is there's a lot of ways that social

	Page 26		Page 27
1	transition in childhood leads to a continued identity	1	BY MR. RAMER:
2	as a cause of it.	2	Q. And can you go to Olson-Kennedy Exhibit 4,
3	I think that people who are socially	3	which is your deposition transcript from Voe versus
4	transitioned in childhood, the majority of them are	4	Mansfield. And specifically go to page 62.
5	trans. And then that is why they continue to assert	5	A. 62 is like the little numbers?
6	a transgender identity in adolescence.	6	Q. Correct.
7	Q. And just to confirm because I'm I'm	7	A. Okay.
8	not sure I heard an answer to this precise question.	8	Q. And beginning at line 8
9	But during your deposition in Voe versus	9	A. Yes.
10	Mansfield, when you were asked whether you agree with	10	Q you see you were asked about this
11	this statement, you said you do not; correct?	11	particular sentence. And at line 13, you are asked,
12	MR. SELDIN: I object to form. Foundation.	12	do you agree with that statement?
13	THE WITNESS: I think that the way the	13	And at line 14, you answered "I do not."
14	the there's the way that this is this	14	Correct?
15	sentence is perceived and it's the way that it's	15	A. Correct.
16	exactly written.	16	Q. And, Dr. Olson-Kennedy, you are not aware of
17	So the way the sentence is written is the	17	any study that looks at the desistance rate among
18	flavor of it is that early social transition may be a	18	adolescence who do not receive puberty blockers;
19	cause in the persistence of gender dysphoria in	19	correct?
20	adolescence.	20	MR. SELDIN: Object to form.
21	I agree that it's a factor, in that it is	21	THE WITNESS: Oh, my gosh. Can you
22	related. But is it a cause of persistence? I think	22	that's a lot of things in that sentence.
23	that that is the flavor of what this document is	23	Can we go back? Could you say it slower?
24	saying, and that I do not agree with.	24	BY MR. RAMER:
25	///	25	Q. Absolutely.
	Page 28		Page 29
1	You were not aware of any study that looks	1	Q. Can you explain the distinction you're
2	at the desistance rate among adolescents who do not	2	drawing?
3	receive puberty blockers; correct?	3	A. Sure.
4	A. Correct.	4	So when social transition first started
5	MR. SELDIN: Object to form.	5	being described in the Netherlands, they made a
6	THE WITNESS: Correct.	6	distinction between a partial and a complete social
7	BY MR. RAMER:	7	transition.
8	Q. And have any studies demonstrated that	8	So, in other words, children who changed
9	gender affirmation in childhood does not lead to a	9	things like their hair and their clothing were
10	child being transgender who otherwise might not have	10	considered to be partially socially transitioned.
11	been transgender?	11	And children who had changed their name, their

transgender?

BY MR. RAMER:

social transition?

	Daga 20		Page 21
	Page 30		Page 31
1	continue to have a transgender identity, both	1	MR. SELDIN: Object to form. Foundation.
2	personally in my clinic and also from the work by	2	THE WITNESS: I do.
3	Christina Olson.	3	BY MR. RAMER:
4	But I think specifically what you're talking	4	Q. And it's outdated because it requires
5	about, I don't think I've seen a study like that.	5	stereotyping, clothing, toys and games by gender;
6	BY MR. RAMER:	6	correct?
7	Q. And I think you've already touched on this,	7	MR. SELDIN: Object to form.
8	but you think that some of the diagnostic criteria in	8	THE WITNESS: Yes.
9	the DSM-5 are outdated.	9	BY MR. RAMER:
10	Correct?	10	Q. And criterion A-2, that also requires
11	MR. SELDIN: Object to form. Foundation.	11	stereotyping clothing; correct?
12	THE WITNESS: Just for clarity, do you mean	12	A. It does.
13	the diagnosis in adolescence? In adulthood or in	13	Q. And criterion A-3 requires stereotyping
14	childhood?	14	roles in make-believe or fantasy play; correct?
15	BY MR. RAMER:	15	MR. SELDIN: Object to form.
16	Q. Let's start with childhood.	16	THE WITNESS: Yes.
17	A. Yes.	17	BY MR. RAMER:
18	Q. And so let's return to Olson-Kennedy	18	Q. And criterion A-4 requires stereotyping
19	Exhibit 7.	19	toys, games and activities; correct?
20	And on the third page of the document has	20	MR. SELDIN: Object to form.
21	a 512 number, is the beginning of the diagnostic	21	THE WITNESS: Yes. But at least that's
22	criteria for gender dysphoria in children; correct?	22	written in the actual sentence. Yes.
23	A. Yes.	23	BY MR. RAMER:
24	Q. And starting with A-6 on this page, you	24	Q. When you say "it," you're referring to the
25	agree that this criterion is outdated; correct?	25	word stereotypically?
	ugree that this errorier is cutauted, correct.		31 3
	Page 32		Page 33
1	A. Correct.	1	A. I have.
2	Q. And so these criteria we just discussed are	2	Q. And to do that, you are required to
3	outdated as well; correct?	3	stereotype at least some clothing, toys or
4	MR. SELDIN: Object to form.	4	activities; correct?
5	THE WITNESS: Yes.	5	MR. SELDIN: Object to form.
6	BY MR. RAMER:	6	THE WITNESS: That's correct.
7	Q. And as part of your practice, you sometimes	7	I would like to give some context to that.
8	diagnose gender dysphoria in children; correct?	8	I started doing this work 18 years ago, and it was
9	A. Not usually. In prepubertal children, I	9	before I had really started thinking a lot about
10	will most often use a different diagnostic code than	10	these things that are in the diagnostic criteria in a
11	gender dysphoria.	11	very critical way or thinking about the stereotyping,
12	Q. What diagnostic code do you use?	12	because over the last 18 years, it's changed a lot.
13	A. I use gender identity uncertainty.	13	I think we see, for example, like, Target,
14	Sometimes I will use a code that is called "Worried	14	there's much less division of clothes. There's much
15	Well." So that means a family comes in with a lot of	15	less division of toys. And I think that's been a
16	questions, but there's there's not really anything	16	shift over time in our society.
17	medically concerning with that young person.	17	I think 18 years ago, there was a lot of
18	So in most children, they're prepubertal,	18	distinction here.
19	that is the diagnosis I use.	19	So I would say that my utilizing this code
20	Q. And did you say worried well as in	20	over time has changed.
21	W-o-r-r-i-e-d Well?	21	BY MR. RAMER:
22	A. W-e-l-l, yes.	22	Q. When you say "Target," are you referring to
23	Q. Thank you.	23	the store?
24	Have you ever diagnosed a patient with	24	A. I am referring to the store.
25	gender dysphoria in childhood?	25	Q. And what do you think the diagnostic
			, ,

Page 34 Page 35 1 shouldn't be this diagnosis at all in children. 1 criteria should be? 2 2 MR. SELDIN: Object to form. I think that there are some children that 3 3 THE WITNESS: I think that the diagnostic experience distress. 4 criteria should be gender incongruence. That's the 4 But my observation has been that young --5 5 young children who are talking about their gender, first part. 6 6 I think that the utility of a diagnosis of who have their gender acknowledged and have gender 7 7 gender dysphoria in prepubertal children is not affirmation, depending -- well, what we talked about 8 8 necessary, necessarily. a spectrum, oh, you can wear dresses at home or you 9 9 I have not spent a lot of time thinking can wear them outside or you can use a different 10 10 about that because that is a very small number of 11 people that I see in my practice. 11 It is the case that a lot of people no 12 BY MR. RAMER: 12 longer experience that distress after those things 13 Q. And the diagnostic criteria for gender 13 have happened. And their distress reemerges when 14 incongruence does not require the presence of 14 they start puberty. 15 distress; correct? 15 So I -- I don't know what you call that. 16 MR. SELDIN: Object to form. 16 You call that a functioning person who maybe uses a 17 THE WITNESS: That's correct. That's my 17 different name and pronouns. But I don't -- I don't 18 understanding of it. We don't use that in the 18 know that these criteria are necessary or necessarily 19 19 United States. relevant during that time. 20 BY MR. RAMER: 20 I think that there should be -- ideally, 21 Q. But you think that should be the diagnosis 21 there should be a code that says somebody has a 22 that is used for children; correct? 22 gender that's different than their assigned sex at 23 MR. SELDIN: Object to form. 23 24 THE WITNESS: I think this is more 24 And that medical code then translates to any 25 complicated. I have thought sometimes that there 25 potential interventions, but it also derails the Page 36 Page 37 1 coupling of medical procedures that have to do with 1 THE WITNESS: For a diagnosis of gender 2 2 body parts. dysphoria? 3 3 BY MR. RAMER: For example, if somebody changes -- if 4 somebody is assigned female at birth and they change 4 O. In adolescence. Correct. 5 their gender marker to male, and then they go for 5 A. Yes. Yes, I do. 6 6 cervical screening, the insurance may not cover that Q. And why? 7 7 because the gender marker is different from the body A. Because "dysphoria" means distress. And so 8 8 part, if that makes sense. if you just are trans and you don't have gender 9 9 That's how I think it should be. dysphoria, that's what I'm talking about. You 10 BY MR. RAMER: 10 need -- there needs to be a medical code that allows 11 Q. Is the answer the same for adolescents who 11 you to continue care with somebody even if they 12 12 are gender incongruent? aren't experiencing distress anymore. 13 13 MR. SELDIN: Object to form. And usually people who are not experiencing 14 14 THE WITNESS: No. stress are not coming for medical interventions. 15 15 BY MR. RAMER:

Q. Why is it different?

16

17

18

19

20

21

22

23

24

25

A. The criteria for gender dysphoria in -- in adolescence is much more about bodies. And this is one of the reasons you only have to meet two of the criteria in adolescence and adulthood. Because that diagnosis is primarily concerned with what you might do for medical intervention.

Q. Do you think that the presence of distress should be required?

MR. SELDIN: Object to form.

They're coming for medical interventions because of their distress, for the most part.

Q. And so in that answer you said "usually" and "for the most part."

And so is it accurate to say that it is not always the case that those seeking medical interventions are suffering from distress?

MR. SELDIN: Object to form.

THE WITNESS: I think it largely depends how you describe distress.

Do I think that there are people who are

25

Page 38 Page 39 1 coming for medical interventions for no reason 1 defined. 2 2 And so, yes, there's a possibility that whatsoever? No. 3 3 They're coming because there is a missing or anybody could come -- there's infinite possibilities 4 4 a misalignment between their gender and their in medicine. There -- always there are as many 5 5 possibilities as there are humans. physicality. That's why they're coming. 6 6 That tension in and of itself is distressing I think the challenge is that clinically 7 7 for people. significant distress is not really defined in the 8 8 Does it cause functional impairment? I 9 don't think we ever know, because we don't know what 9 BY MR. RAMER: 10 10 it would have been like for them to be cisgender. So Q. So is the requirement of clinically 11 we don't really know how they would function 11 significant stress superfluous then? 12 otherwise. 12 MR. SELDIN: Object to form. Misstates 13 My own interpretation is that -- and I --13 testimony. 14 the reason I say this is I know there are trans 14 THE WITNESS: No. It's not superfluous. 15 people who do not have gender dysphoria. But the 15 It's just not defined. 16 16 people coming to see me for medical intervention have BY MR. RAMER: 17 17 distress. Q. But you agree that somebody can be --18 18 BY MR. RAMER: Let me back up. 19 19 Q. And so there could never be a patient who is You agree that being gender incongruent, in 20 gender incongruent but is not suffering from distress 20 and of itself, is distressful; correct? 21 as the DSM-5 discusses it; correct? 21 MR. SELDIN: Object to form. Misstates 22 22 MR. SELDIN: Object to form. Foundation. testimony. 23 23 Misstates testimony. THE WITNESS: I think there are people who 24 THE WITNESS: I think the problem with the 24 are gender incongruent who are not distressed. 25 25 DSM is that clinically significant distress is not /// Page 40 Page 41 1 BY MR. RAMER: and it's not defined. 2 2 Q. And those people --BY MR. RAMER: 3 3 Q. How do you make a diagnosis under the DSM if Let me back up. 4 For that category of patients, it would be 4 you don't know what it means? 5 inappropriate to give them any form of medical 5 MR. SELDIN: Object to form. Misstates 6 6 intervention; correct? testimony. 7 7 MR. SELDIN: Object to form. Foundation. THE WITNESS: I know what distress means. 8 8 THE WITNESS: I think that if people are But as it's defined here, "clinically 9 9 significant," the DSM does not define that. The not -- I think that if people are seeking medical 10 10 intervention, they have distress. people that I see have distress. That's how I define 11 BY MR. RAMER: 11 12 12 Q. And so nobody who is gender incongruent but And when people have distress, they meet the 13 not distressed within the meaning of DSM-5, would 13 criteria. 14 ever seek a medical intervention. 14 BY MR. RAMER: 15 15 Is that what you're saying? Q. And you know they have distress because they 16 MR. SELDIN: Object to form. Foundation. 16 are seeking medical intervention; is that right? 17 17 MR. SELDIN: Object to form. Misstates Misstates testimony. 18 18 THE WITNESS: And this goes back to what I testimony. 19 19 was saying, is that: What does "clinically THE WITNESS: No. 20 20 significantly distressed" mean? What is clinical --I know that they have distress because I 21 significantly clinically depressed? I mean 21 have long conversations with people. 22 22 distressed. BY MR. RAMER: 23 I don't know that clinically significant 23 Q. And what is the product of those long 24 stress or impairment is not defined in the DSM. This 24 conversations? 25 25 is a very commonly used phrase across the entire DSM, MR. SELDIN: Object to form.

	Page 46		Page 47
1	British Medical Association has called for a pause on	1	So if we could just have a moment to read.
2	the U.K. ban on puberty blockers; correct?	2	We don't need to leave the room, but it would be
3	A. Yes.	3	helpful.
4	Q. And that sentence is no longer accurate, is	4	MR. RAMER: We'll go off the record.
5	it?	5	MR. SELDIN: Thank you.
6	MR. SELDIN: Object to form. Foundation.	6	THE VIDEOGRAPHER: The time now is 10:36
7	THE WITNESS: I don't know.	7	a.m.
8	MR. RAMER: I'm handing the court reporter	8	We are off the record.
9	what I'll ask to be marked as Olson-Kennedy	9	(Off record.)
10	Exhibit 8.	10	MR. RAMER: We'll go back on.
11	(Deposition Exhibit 8 was marked for	11	THE VIDEOGRAPHER: The time is 10:37 a.m.
12	identification by the court reporter.)	12	We are back on the record.
13	THE WITNESS: I think this is the wrong	13	BY MR. RAMER:
14	thing. It's just that single page.	14	Q. And, Dr. Olson-Kennedy, the document that's
15	BY MR. RAMER:	15	been marked as Olson-Kennedy Exhibit 8 is a report
16	Q. And, Dr. Olson-Kennedy, you've been handed	16	published in the British Medical Journal; correct?
17	what's been marked as Olson-Kennedy Exhibit 8; is	17	MR. SELDIN: Object to form.
18	that correct?	18	THE WITNESS: That is what it looks like.
19	A. Yes.	19	BY MR. RAMER:
20	Q. And this appears to be a report published in	20	Q. And the first sentence of this document,
21	the BMJ; correct?	21	I'll read it and ask if I read it correctly, says:
22	MR. SELDIN: Mr. Ramer, I would just like to	22	"The BMA has retracted its call for the U.K.
23	note that I don't believe that this was one of the	23	government to lift the ban on prescribing puberty
24	exhibits that you had noted in our correspondence you	24	blockers to under 18s with gender dysphoria while the
25	intended to use.	25	association conducts an evaluation of the Cass
	Page 48		Page 49
1	Review's recommendations."	1	course.
2	Did I read that correctly?	2	MR. RAMER: And I'm at a point where it's
3	A. Yes.	3	kind of a good stopping point.
4	Q. And so returning to Exhibit 6, which is your	4	If this works for you, I'll take a short
5	amicus brief, and page 10 in the final sentence of	5	little break. Does that work for you?
6	the carry-over paragraph from page 9.	6	THE WITNESS: Sure. Yeah.
7	According to the report that we just read,	7	MR. RAMER: Go off.
8	that sentence is incorrect; right?	8 a	THE VIDEOGRAPHER: The time now is 10:39
9	MR. SELDIN: Object to form.		a.m.
10	THE WITNESS: I guess I'm not understanding	10	We're now off the record.
11 12	the question at the time that this was prepared, that	11 12	(Short recess.)
13	is correct. That has the PMA retreated, that's called	13	MR. RAMER: Ready.
14	That has the BMA retracted, that's called,	14	THE VIDEOGRAPHER: One moment, please. The time is 10:52 a.m., and we're back on
15	yes. BY MR. RAMER:	15	the record.
16	Q. And was this deposition the first that you	16	BY MR. RAMER:
17	became aware of the BMA retracting that call?	17	Q. Welcome back, Doctor.
18	A. Yes.	18	A. Thank you.
19	Q. And do you think that you should correct the	19	MR. RAMER: I'm going to hand the court
20	statement made on your behalf to the Supreme Court of	20	reporter what I'll ask to be marked as Olson-Kennedy
21	the United States?	21	Exhibit 9.
22	MR. SELDIN: Object to form.	22	(Deposition Exhibit 9 was marked for
23	THE WITNESS: I don't know the answer to	23	identification by the court reporter.)
24	that.	24	THE WITNESS: Thank you.
25	Yes. I mean, we want it to be accurate, of	25	///
	•		

Page 50 Page 51 1 1 BY MR. RAMER: BY MR. RAMER: 2 2 Q. And, Dr. Olson-Kennedy, you've been handed Q. And this first one, which is labeled 3 3 what's been marked as Olson-Kennedy Exhibit 9. "Informed Consent Form for Feminizing Medications," 4 parenthesis, "(transfeminine individuals on GnRH 4 And these are the Informed Consent forms 5 5 Analogs)," this form would be used for natal males used for patients receiving treatment at Children's 6 6 who either had their endogenous --Hospital of Los Angeles; correct? 7 7 A. The first part of these are a consent and e-n-d-o-g-e-n-o-u-s -- puberty blocked or who had not 8 8 assent forms for participating in a study. yet experienced male pubertal development; correct? 9 9 The second part of this packet has consent A. Or were in their -- we would not be giving 10 10 hormones to somebody who had not yet started puberty forms for medical interventions. 11 Q. And when you say "the second part of the 11 but if they were in early puberty. 12 packet," can you direct me to what page you're 12 Q. And so the answer to the question was yes, 13 13 and also for those who have not had a significant talking about? 14 A. The first one is the Informed Consent for --14 amount of male pubertal development; is that right? 15 form for feminizing medications. That's the 15 MR. SELDIN: Object to form. Misstates 16 16 beginning of the clinical consent form. testimony. 17 These are not part of the study. 17 THE WITNESS: This form is for people who 18 18 either had GnRH analogs that were started in early Q. Thank you. 19 19 puberty or people who are starting hormones who have And beginning with these Clinical Consent 20 20 not yet experienced a lot of their puberty. forms, these are either the forms that you're using 21 BY MR. RAMER: 21 today or are extremely close to what you're using 22 22 today; correct? Q. Thank you. 23 23 And to your knowledge, this consent form is MR. SELDIN: Object to form. 24 THE WITNESS: Yes. 24 accurate in its description of the risks of 25 /// 25 feminizing medications; correct? Page 52 Page 53 1 A. Yes. 1 THE WITNESS: Yes. 2 2 Q. And so on this page down at No. 5, you agree BY MR. RAMER: 3 3 that a person who begins taking puberty blockers in Q. And a pulmonary embolism is a blood clot to 4 early puberty and then proceeds to feminizing 4 the lungs; correct? 5 hormones will be infertile; correct? 5 A. That's correct. 6 6 MR. SELDIN: Object to form. Q. And a pulmonary embolism can cause permanent 7 7 THE WITNESS: This is why the word "likely" lung damage or death; correct? 8 8 is in there. A. Correct. 9 9 BY MR. RAMER: Q. And then second bullet under 6, you agree 10 Q. And so is the answer yes? 10 that feminizing medications increase the risk of 11 A. They are likely to be infertile. 11 stroke; correct? 12 Q. And you agree that if a person is on puberty 12 MR. SELDIN: Object to form. 13 blockers in early puberty and they stay on feminizing 13 THE WITNESS: These are the potential things 14 hormones, they will not make mature sperm; correct? 14 that can happen when somebody gets a blood clot. 15 15 A. Yes. If they stay on those interventions. MR. SELDIN: Mr. Ramer, I apologize for 16 Q. Thank you. 16 interrupting. 17 Going to the next page, No. 6, you agree 17 The screen that has the Zoom appears to be 18 that feminizing medications increase the risk of 18 off. I wasn't sure --19 blood clots; correct? 19 MR. RAMER: It's -- want to go off? 20 MR. SELDIN: Object to form. 20 MR. SELDIN: Yeah. 21 THE WITNESS: Minimally, yes. 21 THE WITNESS: Oh, yeah. 22 BY MR. RAMER: 22 THE VIDEOGRAPHER: The time is 10:58 a.m. 23 Q. And you agree that feminizing medications 23 We're off the record. 24 increase the risk of a pulmonary embolism; correct? 24 (Off record.) 25 MR. SELDIN: Object to form. 25 THE VIDEOGRAPHER: Let me know when you're

	Dana 54		Dama EE
	Page 54		Page 55
1	ready.	1	A. Yes.
2	MR. SELDIN: Doctor, are you ready?	2	Q. And you agree that a stroke may cause
3	THE WITNESS: Yes. I'm ready.	3	permanent brain damage or death; correct?
4	THE VIDEOGRAPHER: The time is 11:03 a.m.,	4	A. Yes.
5	and we are back on the record.	5	Q. And next bullet, you agree that feminizing
6	BY MR. RAMER:	6	medications increase the risk of heart attack;
7	Q. Okay. Doctor, we are on Olson-Kennedy	7	correct?
8	Exhibit 9. And we were looking at the second page of	8	MR. SELDIN: Object to form.
9	the Informed Consent form for feminizing medications	9	THE WITNESS: Feminizing hormones increase
10	for transfeminine individuals on GnRH analogs.	10	the risk of blood clots, which could potentially lead
11	And we were looking at No. 6 on page 2 of	11	to a heart attack, yes.
12	that form. And we were on, I believe, the second	12	BY MR. RAMER:
13	bullet.	13	Q. And the next bullet, you agree that
14	And my question is: You agree that	14	feminizing medications increase the risk of chronic
15	feminizing medications increase the risk of stroke;	15	leg vein problems; correct?
16	correct?	16	MR. SELDIN: Object to form.
17	MR. SELDIN: Object to form.	17	THE WITNESS: Same issue. That estrogen
18	THE WITNESS: Estrogen increases the risk of	18	specifically and I think this is important
19	blood clots. I have never seen a study that looked	19	increases the risk of blood clots minimally which can
20	at the incidence of any of these things, pulmonary	20	lead to chronic leg vein problems.
21	emboli, stroke, heart attack or chronic leg vein	21	BY MR. RAMER:
22	problems.	22	Q. Is it fair to say that a pulmonary embolism,
23	BY MR. RAMER:	23	a stroke or a heart attack is detrimental to people's
24	Q. You agree that blood clots can result in	24	physical health?
25	stroke; correct?	25	A. Yes.
	Page 56		Page 57
1	Q. And same page, No. 7, further down the page,	1	medications can cause tumors of the pituitary gland;
2	the second bullet under No. 7. You agree that	2	correct?
3	feminizing medications can lead to increased blood	3	MR. SELDIN: Object to form.
4	pressure; correct?	4	THE WITNESS: Correct.
5	MR. SELDIN: Object to form.	5	BY MR. RAMER:
6	THE WITNESS: Yes.	6	Q. And those tumors can damage vision and cause
7	BY MR. RAMER:	7	headaches; correct?
8	Q. And next bullet, you agree that feminizing	8	MR. SELDIN: Object to form.
9	medications can lead to increased risk of gallstones;	9	THE WITNESS: Correct.
10	correct?	10	BY MR. RAMER:
11	MR. SELDIN: Object to form.	11	Q. And so let's go two pages forward in
12	THE WITNESS: Yes.	12	Olson-Kennedy Exhibit 9.
13	BY MR. RAMER:	13	And at the top, it says "Informed Consent
14	Q. And next bullet, you agree that feminizing	14	Form for Feminizing Medications"; correct?
15	medications can lead to nausea and vomiting; correct?	15	A. Correct.
16	MR. SELDIN: Object to form.	16	Q. And this is the Informed Consent Form for
		1	Especialists Medicarious and assess desirable actual and assess
17	THE WITNESS: Yes.	17	Feminizing Medications when used with natal males who
		17	either are well into male puberty or have gone
17	THE WITNESS: Yes. BY MR. RAMER: Q. And next bullet, you agree that feminizing		
17 18	THE WITNESS: Yes. BY MR. RAMER:	18	either are well into male puberty or have gone
17 18 19	THE WITNESS: Yes. BY MR. RAMER: Q. And next bullet, you agree that feminizing	18 19	either are well into male puberty or have gone through male puberty; correct?
17 18 19 20	THE WITNESS: Yes. BY MR. RAMER: Q. And next bullet, you agree that feminizing medications can lead to headaches and migraines; correct? MR. SELDIN: Object to form.	18 19 20	either are well into male puberty or have gone through male puberty; correct? MR. SELDIN: Object to form.
17 18 19 20 21	THE WITNESS: Yes. BY MR. RAMER: Q. And next bullet, you agree that feminizing medications can lead to headaches and migraines; correct?	18 19 20 21	either are well into male puberty or have gone through male puberty; correct? MR. SELDIN: Object to form. THE WITNESS: Correct.
17 18 19 20 21 22 23 24	THE WITNESS: Yes. BY MR. RAMER: Q. And next bullet, you agree that feminizing medications can lead to headaches and migraines; correct? MR. SELDIN: Object to form. 17 18 19 20 21 22 23	THE WITNESS: Yes. BY MR. RAMER: Q. And next bullet, you agree that feminizing medications can lead to headaches and migraines; correct? MR. SELDIN: Object to form. THE WITNESS: Correct.	18 19 20 21 22 23	either are well into male puberty or have gone through male puberty; correct? MR. SELDIN: Object to form. THE WITNESS: Correct. Sorry. MR. SELDIN: I object to form.

15 (Pages 54 to 57)

	Page 58		Page 59
1	BY MR. RAMER:	1	Adolescence."
2	Q. And does this form accurately excuse me.	2	Do you see that?
3	Does this form accurately describe the risks	3	A. I do.
4	of feminizing medication?	4	Q. And this is the form you would use for
5	A. I have to go through it again, but yes,	5	people starting puberty blockers in early
6	basically.	6	adolescence; correct?
7	We've changed some of our recommendations	7	A. This is the form that we would use for
8	based on our findings, particularly around	8	anybody going on to puberty blockers at any point in
9	prolactinomas, which is bullet number	9	their development.
10	9. It's No. 9, not bullet point.	10	Q. And in what scenario would you give somebody
11	Q. And what have you changed?	11	who is not in early adolescence, puberty blockers?
12	A. We haven't changed it on our form yet. But	12	MR. SELDIN: Object to form. Misstates
13	they're we have not seen that. And there have	13	testimony.
14	been a couple of studies I think that have	14	THE WITNESS: Sometimes puberty blockers are
15	demonstrated that this is no longer a finding.	15	used for just halting further development.
16	Q. What are those studies?	16	So, for example, if somebody was in maybe
17	A. I can't remember them offhand. One of them	17	Tanner Stage 4 and they didn't want to get additional
18	came from our team, the one that I think it's the	18	breast development and they wanted to stop having a
19	last one on my CV.	19	period, that they could go on puberty blockers for
20	Q. Apart from the number about prolactinomas,	20	those purposes.
21	does, this form accurately describe the risks of	21	BY MR. RAMER:
22	feminizing medication?	22	Q. So why would you not just use the cross-sex
23	A. Yes.	23	hormone for somebody at Tanner Stage 4?
24	Q. And after this form, there's a form with the	24	A. That's they're not at that place where
25	title "Pubertal Blockers for Minors in Early	25	they want that yet. That's not what they need in
	,		, ,
	Page 60		Page 61
1	-	1	-
1	that moment. They want to take a pause and not have	1 2	evidence about how pubertal suppression affects young
2	additional development. But they're not necessarily	3	people's judgment in decision-making; correct? MR. SELDIN: Object to form.
4	wanting or ready for moving forward, or their parents	4	THE WITNESS: Only clinical experience.
5	not might not be ready. Q. And when you say "that's not what they	5	BY MR. RAMER:
6		6	Q. And so we do not have scientific evidence
7	need," that need is based on the patient's embodiment	7	
	goals; correct?	8	about how puberty suppression affects young people's judgment in decision-making; correct?
8 9	MR. SELDIN: Object to form.	9	
,	THE WITNESS: Correct.	1	MR. SELDIN: Object to form. Asked and
10	BY MR. RAMER:	10 11	answered.
11	Q. Sticking with this form, next page, down	12	THE WITNESS: That's correct.
12	below the bold "Risks of Puberty Blockers," do you		BY MR. RAMER:
13	see that?	13	Q. And going forward three pages, there's a
14	A. I do.	14	form with the title "Informed Consent Form for
15	Q. And looking at the first bullet, you agree	15	Testosterone Therapy."
16	that the side effects and safety of puberty blockers	16	Do you see that?
17	are not completely understood; correct?	17	A. Yes.
18	A. That's correct.	18	Q. And on this page, No. 3, the first sentence
19	Q. And you do not know whether delaying puberty	19	says: "It is not known what the effects of
20	in an adolescent changes the adolescent's brain	20	testosterone are on fertility"; correct?
21	development; correct?	21	A. Yes.
22	MR. SELDIN: Object to form.	22	Q. And if a natal female begins taking
23	THE WITNESS: That's correct.	23	masculinizing hormones and later stops them, we don't
24	BY MR. RAMER:	24	know whether that person will regain the ability to
25	Q. And you agree that we do not have scientific	25	be fertile; correct?

16 (Pages 58 to 61)

	Page 62		Page 63
1	MR. SELDIN: Object to form.	1	phrase "Increase the red blood cells."
2	THE WITNESS: We don't know that. But I	2	Do you see that?
3	think it's important to add that we didn't really	3	A. I do.
4	know their fertility status before they started.	4	Q. And you agree that masculinizing medications
5	And we also know that there are a lot of	5	increase the risk of stroke and heart attack;
6	people who have stopped testosterone and carried	6	correct?
7	pregnancies or harvested eggs.	7	MR. SELDIN: Object to form.
8	BY MR. RAMER:	8	THE WITNESS: Yes.
9	Q. When you say we don't know their fertility	9	BY MR. RAMER:
10	status before we started, what do you mean by that?	10	Q. And next bullet, you agree that
11	A. That person could have not had the capacity	11	masculinizing hormones increase the risk of diabetes;
12	to get fertile. I mean, they we don't know what	12	correct?
13	their capacity would've been to get pregnant at all.	13	MR. SELDIN: Object to form.
14	Q. Is that something that you assess in your	14	THE WITNESS: Yes.
15	patients?	15	BY MR. RAMER:
16	A. No.	16	Q. And next bullet, you agree that
17	Q. And sticking with this page I'm sorry	17	masculinizing hormones can risk the HIV; correct?
18	next page, under "Risks of Testosterone," the first	18	MR. SELDIN: Object to form.
19	bullet under that, you agree that masculinizing	19	THE WITNESS: Yes.
20	medications can increase the risk of heart disease;	20	BY MR. RAMER:
21	correct?	21	Q. And next bullet, you agree that
22	A. Yes.	22	masculinizing hormones can cause headaches or
23	Q. And on this page after that bullet, there	23	migraines; correct?
24	are three bullets. Then there's a paragraph, and	24	MR. SELDIN: Object to form.
25	then there's another bullet that begins with the	25	THE WITNESS: Yes.
	Page 64		Page 65

Q. When you prescribe a patient puberty blockers, you do not expect an increase in body satisfaction; correct?

A. It's not the same for every patient. Some people have improvement and some people don't.

If you look at the overarching response, at least what our data is demonstrating, it's pretty much neutral.

That doesn't capture the variability in each individual.

Q. And so when you say that puberty blockers are effective, all you mean by that is that they halt endogenous puberty; correct?

MR. SELDIN: Object to form. Misstates testimony.

THE WITNESS: Well, like I said, it's an individual thing. So there are some people that experience a lot of distress about going through puberty or the idea of going through puberty. And for those patients, their anxiety and stress diminishes because they don't have to think about that anymore.

There are some people who go on puberty blockers who experience a lot of anxiety about the fact that they are not going through the puberty that aligns with their gender. So for them, they might have increased anxiety.

That's why I'm saying there's variability between individuals.

BY MR. RAMER:

Q. But the purpose of prescribing the puberty blockers as part of the sequence of gender-affirming care, is not to decrease anxiety and distress; correct?

MR. SELDIN: Object to form.

THE WITNESS: Correct. It's to stop the progress of their endogenous puberty.

BY MR. RAMER:

Q. And there is no instrument for measuring gender dysphoria; correct?

MR. SELDIN: Object to form.

THE WITNESS: There are a handful of scales that attempt to do that and, for example -- but I think the earliest ones that we see, the Utrecht

23 (Pages 86 to 89)

Page 90 Page 91 1 1 gender dysphoria scale does not. and the gap closing, is the transgender congruence 2 2 I think that there are other scales that scale, appearance subscale. And that's why --3 3 I've talked about before -- I can't remember the (Reporter clarification.) 4 exact name. I will in a minute -- that have been 4 THE WITNESS: The transgender congruence 5 5 proposed and have been modified over time. scale, specifically the appearance congruence 6 6 BY MR. RAMER: subscale. 7 7 Q. But you do not in your practice or research, BY MR. RAMER: 8 8 Q. And when you were discussing the transgender use an instrument that specifically measures gender 9 9 dysphoria; correct? congruence scale, you measure -- excuse me -- you 10 A. We use a combination of instruments for 10 mentioned both acceptance and appearance; correct? 11 that. 11 A. Correct. 12 Q. What combination? 12 Q. And can you explain what you mean by 13 A. Well, we have not put this together formally 13 "acceptance"? 14 yet, but we utilize -- transgender congruence is one 14 A. So the transgender congruence scale has 15 15 of the most common scales that actually measures both these two subscales. So the acceptance piece is 16 16 acceptance and appearance, which helps us understand about --17 17 about the gap between someone's physicality and their I didn't know if you needed a minute. 18 18 gender, which is the purpose of utilizing Q. No. I'm sorry. 19 19 gender-affirming hormones. A. -- the pieces about self-acceptance. Q. Self-acceptance of what? 20 Does that capture all of gender dysphoria? 20 21 21 No. But it does capture this idea of minimizing this A. Transexperience, transgender experience. 22 gap to the best of our ability. 22 Q. And what is appearance measuring? 23 23 Q. And there is no instrument that you're aware A. Appearance congruence? It's measuring how 24 of that would fully minimize that gap; correct? 24 aligned somebody's physicality is with their gender. 25 25 A. Well, the instrument that captures the gap Q. And I think we've discussed this, but I want Page 92 Page 93 1 MR. SELDIN: Object to form. 1 to make sure, that for any particular patient, the 2 THE WITNESS: Correct. 2 gender-affirming medical intervention that is 3 3 MR. RAMER: And I'm at a decent stopping indicated, is driven by the patient's embodiment 4 4 goals; correct? 5 A. That's correct. 5 THE WITNESS: Thank you. 6 6 MR. RAMER: Let's go off the record. Q. And you think that gender-affirming care 7 7 THE VIDEOGRAPHER: The time is 11:51 a.m. includes a natal female receiving implants to have 8 8 We are off the record. larger breasts; correct? 9 9 MR. RAMER: 14 BY MR. RAMER: 15 Q. During your deposition in Noe versus Parson, 15 Q. Dr. Olson-Kennedy, welcome back. 16 you were asked if a natal female identifies as 16 A. Thank you. 17 female, but naturally has a very small chest and 17 Q. I'd like to return to Olson-Kennedy 18 wants a breast augmentation to better align her body 18 Exhibit 6, which is your amicus brief. 19 with her conception of her gender as female, would 19 And I'd like to go to page 20. 20 that also be gender-affirming in your terminology, 20 And under the bold No. 1, there's a 21 and you answered "yes"; correct? 21 paragraph where the brief is talking about using the 22 22 GRADE, all caps, "METHODOLOGY FOR ASSESSING EVIDENCE 23 Q. And so you think gender-affirming care QUALITY." 23 24 includes a natal female receiving implants to have 24 Correct? 25 larger breasts; correct? 25 A. Yes.

Page 94 Page 95 1 Q. And you have never used the GRADE 1 reviews, a rigorous type of literature search 2 2 methodology; correct? considered to be the gold standard for assessing the 3 3 A. That's correct. quality of medical evidence, and were conducted by 4 4 Q. And you do not know how the GRADE authors affiliated with the University of York," 5 5 parenthesis, "the York SRs." methodology considers expert opinion versus other 6 6 Did I read that correctly? types of evidence; correct? 7 7 A. I have heard people assert that over the A. Yes. 8 8 last handful of months. Q. And do you agree that systematic reviews are 9 the gold standard for assessing medical? 9 Q. Apart from those assertions, you do not have 10 10 an understanding of how the GRADE methodology A. I guess. 11 distinguishes between expert opinion and other types 11 Q. What do you mean you guess? 12 of evidence; correct? 12 A. I -- I mean, I'm not -- this is not my field 13 13 A. That's correct. of study. This is what is said in the general world. 14 14 Q. And sticking with this brief, like to go to But my concern is that systematic reviews 15 15 are very biased. page 4. 16 16 And first full paragraph on the page, Q. Biased in --17 there's a sentence that begins with "First." Then 17 A. Essentially very biased. 18 18 there's a citation, and then there's a sentence that Q. Biased in what way? 19 19 begins with "These reviews." A. So I think as we talk about in -- in this 20 20 Do you see that? report that we published, the criterion for 21 21 consideration in the review is subjective, so people A. Yes. 22 22 Q. And I'll first just ask -- I'll first read pick it. Right? That's a human being on the other 23 23 it and ask if I read it correctly. end of it that's picking the criteria. 24 24 It says: So is it leaving out a lot of studies? 25 25 "These reviews are billed as systematic Yeah, like as witnessed by the York systematic Page 96 Page 97 1 reviews. They left out a lot of studies. And they 1 BY MR. RAMER: 2 left them out for reasons like, they -- they 2 Q. Can you explain what you mean by that? 3 3 considered under 18 and 18 and older, so they were A. So if a systematic review is undertaking --4 4 disqualified. Right? again, broadly conceptualizing what the purpose of 5 5 Or they didn't measure this specific outcome the systematic review is, is a really important part 6 6 that we identified as important. Right? That's -of that question. 7 7 that's a significant issue with systematic reviews. So if the systematic review overall is 8 8 Q. And is that an issue with systematic reviews saying, we want to look at all of the evidence, well, 9 9 generally or specifically with the systematic reviews what if it's not an intervention that's related to 10 associated with the Cass Review? 10 safety? Right? 11 A. Generally they all are subjective in that 11 What if it's an intervention that is 12 12 completely unrelated? Then that wouldn't be an way. 13 13 Q. And so do you consult systematic reviews as important thing, necessarily. 14 14 part of your practice? But if they're looking at the -- they're 15 15 A. Possibly in the past. Not that I can recall looking at the results of intervention specifically 16 16 specifically. related to medications or surgical things, then 17 17 Q. And you've never conducted a systematic safety is an important part of it. 18 18 review; correct? Q. How many systematic reviews have you read 19 19 A. That's correct. that assess the quality of the evidence for using 20 20 Q. In your opinion, should a systematic review medical interventions to treat gender dysphoria in 21 21 look at the safety of the interventions under study? minors? 22 22 MR. SELDIN: Object to form. A. Probably five or six. I don't know the 23 THE WITNESS: I think that depends on what 23 exact number. 24 the systematic review is doing. 24 Q. And do you recall which ones you read? 25 25 /// A. I have read the York systematic reviews,

Page 98 Page 99 1 which I think -- well, I don't know if we call the Cass Review. 2 one that -- this is an exact example. Right? It's Other reviews have also come to the 3 analyzing standards of care. Right? I don't think conclusion that there needs to be more data. And it they were analyzing for the safety of the standards 4 depends on the specific thing that they're looking 5 of care development. That one. 6 There were two about blockers. There was Q. And are you able to name a single study 7 one about social transition. There was the one that demonstrating that any form of medical transition 8 was from the Johns Hopkins group for the standards of reduces the rate of completed suicide among any 9 care development. population of minors? 10 There's another one. I can't remember the MR. SELDIN: Object to form. Foundation. author. I'd have to look back, 'cause I think it 11 THE WITNESS: I really don't know how a he's in my bibliography. 12 study would look at rate of completed suicides and So, yeah, six or -- six or seven, something 13 their reasons. I just don't think that's possible. 14 BY MR. RAMER: like that. 15 Q. And do you recall generally what the Q. And so you would say it's pointless to even 16 conclusions were of the systematic reviews that you try to review literature on the connection between a 17 have read that assess the quality of evidence for form of medical transition and death by suicide; 18 using medical interventions to treat gender dysphoria correct? 19 MR. SELDIN: Object to form. Misstates in minors? 20 A. Well, it depends on the review. So I think, testimony. like, this is another thing that was -- was 21 THE WITNESS: I am open to somebody 22 unexplained in the Cass report, that both of the proposing how such a study would be done. But I have 23 Taylor reviews, they actually found a moderate and never seen that, nor can I conceptualize how that high quality evidence for the interventions. But 24 would be done. 25 that wasn't really talked about very much in the /// Page 100 Page 101 1

BY MR. RAMER:

Q. And during your deposition in Noe versus Parson, you were asked whether you were saying that it would be pointless to even try to review literature on the connection between a form of medical transition and death by suicide.

And your answer was "Correct, yes."

Correct?

A. Yes.

Q. And sticking with Exhibit 6, which is your amicus brief, going to page 18.

And in the first paragraph -- excuse me -in the first paragraph, about halfway down, you're criticizing the Cass Review's use of the Newcastle Ottawa scale; correct?

A. Correct.

Q. And you have never used the Newcastle Ottawa scale; correct?

A. That's correct.

Q. And going to page 24, the same exhibit, the first full sentence on this page says:

"Indeed the GRADE authors state explicitly that technically low quality evidence can and does support strong recommendations for clinical care."

Did I read that correctly?

A. Yes.

Q. You are not familiar with the paradigmatic examples in which the GRADE system says one can make a strong recommendation based on low quality evidence; correct?

MR. SELDIN: Object to form.

THE WITNESS: I'm not sure I know what that means

BY MR. RAMER:

Q. And in your deposition in Noe versus Parson, you were asked:

"Are you familiar with the developers of the GRADE system providing the paradigm under which you can make a strong recommendation based on low quality evidence?"

And your answer was "no"; correct?

A. Correct.

THE REPORTER: 11.

(Deposition Exhibit 11 was marked for identification by the court reporter.)

BY MR. RAMER:

- Q. And, Dr. Olson-Kennedy, you've been handed what's been marked Olson-Kennedy Exhibit 11; correct?
- Q. And is this one of the Taylor systematic

And it's only coercion, though, if the intervention at issue has substantial evidence of effectiveness; correct? A. No. I don't think you can ever say to someone, you can only access this if you're in a research protocol. That's not how medicine works. Going back to what I said before, is that clinical care far outpaces empirical evidence. It

Page 106

Page 107

you would say to
1 experimental drugs and cancer treatment, where they have, like, okay, we can try this, but we're not

4 that.5 But that's not my field of expertise.

Q. Well, in the context of an experimental drug where they're saying, we can try this, and it might work, but it might not, do you think that limiting the use of that experimental drug to research trials is coercive?

guaranteeing it's going to work, or something like

MR. SELDIN: Object to form.

THE WITNESS: I don't know. I'd have to think about that for a longer period of time. BY MR. RAMER:

- Q. What would you need to think about?
- A. I'd have to think about a scenario in which that happened, which I don't know of any. And so that makes it hard for me to form an opinion about.
- Q. And so if it were the case that gender-affirming medical interventions did not have substantial evidence demonstrating their effectiveness, you could not say that limiting the use of those interventions to a research trial is coercive; correct?

MR. SELDIN: Object to form.

So I don't really know how you would say to someone, you can only have this access if you're in a research trial.

Maybe in the case of cancer or something like that, but I'm not familiar with that domain of medicine.

But as far as I know, requiring people to be in research is coercion.

- Q. And that point applies not just to gender-affirming medical interventions, but to all medical interventions; correct?
- A. I can't speak for every single medical intervention. But in general, not allowing people access to care except through a research protocol is a problem.
- Q. And I just -- to make sure we're not quibbling over the word "care," when you use the word "care," are you -- does the word "care" in your view carry with it some sort of sense of established evidence showing effectiveness?
 - A. As opposed to?

- Q. A medical intervention where we don't know whether it's effective or not.
- A. I don't know. I haven't lived in the world. I think the only place where that happens is like

Page 108

Page 109

THE WITNESS: That was a long sentence. I -- so, for example, I have no idea if when, for example, the Dutch started using blockers for youth with gender dysphoria, if everyone was enrolled in a study.

My guess is probably what happened was that they collected data routinely and then went back and looked at it. In other words --

I don't know this for sure, but a lot of times what happens is people are collecting data in the course of their clinical care, and then they go back and analyze it. And they don't say, we're prospectively enrolling people and we're going to watch what happens to them.

It's, we're -- we're doing this clinical care, and we utilize these tools at different time points.

I don't know if that's what they did or not.

I think that, again, the situation in these countries that have a national health system, are very different than the ones in the United States. BY MR. RAMER:

Q. And so you think it's possible that the Dutch researchers began --

Let me back up.

You think it's possible that the Dutch clinicians began prescribing puberty blockers as a treatment for gender dysphoria before they began studying it as part of a research trial?

Is that correct?

MR. SELDIN: Object to form.

THE WITNESS: I know that the first thing that the Dutch ever published was a case review, and that's not a prospective trial. That's the situation of one individual.

So I can't answer whether they did or not, but I do know that their first publication about this was not a prospective longitudinal trial. BY MR. RAMER:

Q. Do you think it would be unethical to conduct a research trial with two arms, where one arm --

Let me back up.

In the context of adolescents with gender dysphoria, do you think it would be ethical to perform a research trial where there are two arms to the trial. One arm is referring to psychotherapy; one arm is receiving psychotherapy and medical interventions?

A. Well, there have been studies like that that

MAGNA

28 (Pages 106 to 109)

Page 110 Page 111

have looked at exactly those comparisons.

But are you talking about like you never giving me medical intervention and -- or over time, you're going to get medical intervention?

I don't think it's ethical to say, you're not going to get any medical intervention ever. And it's not only unethical, it's not feasible.

Q. What's not feasible?

- A. To enroll people into a mental health only arm.
 - Q. Why is that not feasible?
 - A. Because they wouldn't want to do it.
- Q. And when you say there have been studies conducting that type of research, are you referring to anything other than the Costa study?
- A. I think that -- I have to look through the study specifically. But I think Van Der Miesen did this also.
- Q. And -- so you say it would -- just to back up and answer -- the question is: That type of question is ethical; correct?
 - A. The one -- the Costa study? C-o-s-t-a?
- Q. If the Costa study is a study like the one that I described of two arms, one arm receiving psychotherapy, another receiving psychotherapy and

medical interventions, that study is ethical; correct?

MR. SELDIN: Object to form.

THE WITNESS: I don't remember if the follow-up with the psychotherapy-only arm was intended to get treated. I don't remember that. I have to go back to the paper.

If it was never intended to get care, I would not think that was ethical actually. BY MR. RAMER:

- Q. What if the study was designed that they would receive care when they turn 18?
 - A. Maybe.
- Q. Maybe what?
 - A. Maybe that could be ethical. I'd have to see it to -- to make that determination.
 - Q. Because what gives you concern about that type of study?
 - A. I think a type of study that does not allow people access to care when they first engage in care, is really problematic for people. We know that untreated gender dysphoria is really harmful.

And so what we're talking about is over, you know, a hundred years or more, psychotherapy is the sole intervention, as monotherapy is not effective.

Page 113

Page 112

There have never been studies demonstrating that. It is not effective in eradicating or significantly decreasing gender dysphoria.

So now you're talking about randomizing an arm of the study into something that we know is harmful, which is gender dysphoria, with a treatment that has never been proven to be successful.

- Q. So to break that down, for one, you could conduct a study, like the one I'm describing, without randomizing patients; correct?
 - A. Yes, you could.
- Q. And did I understand in your answer -- did you say something that there have been studies for a century saying that psychotherapy doesn't work for gender dysphoria?
- A. There have been -- the predominant issue, when gender dysphoria, transgender experience moved into the world of medicine and science, people thought that psychotherapy was what would make people not be trans anymore. And that's never been demonstrated to be true.

It did not talk about gender dysphoria in the way that we're talking about it today.

But because being gender incongruent was considered psychopathological, the efforts were aimed

at therapy, psychiatry, mental health therapy, sexology. All of those things.

And over that time, there has never been a study demonstrating that psychotherapy alone manages gender dysphoria.

- Q. Do you agree that there's a distinction between psychotherapy with the purpose of making someone not transgender and psychotherapy with the purpose of resolving somebody's distress associated with gender dysphoria?
- A. Yes, there's a difference between those things.
- Q. And I'm talking about the latter category, the psychotherapy that is done for the purpose of resolving distress associated with gender dysphoria.

And my question is: Do you think that qualifies as care for gender dysphoria?

- A. Not by itself. I think that psychotherapy can help people manage their distress. But I don't think it is eliminating the consternation that they feel about the misalignment.
- Q. What's the basis for that opinion that you just gave?
- A. A hundred years of people trying to do that. And when medications became available, people used

29 (Pages 110 to 113)

	Page 114		Page 115
1		1	
1	them to close that gap. And have been for 90 years,	1	do, especially with youth care. They go
2	80, 90 years.	2	hand-in-hand. The it's it is not it's
3	Q. And so, just to make sure I understand.	3	not it's never been shown that psychotherapy alone
4	Your opinion is that psychotherapy to help resolve	4	manages gender dysphoria.
5	distress associated with gender dysphoria is	5	Q. And your opinion is that it has been
6	ineffective based on studies from the last 80 to	6	demonstrated that it does not; is that right?
7	90 years; is that right?	7	A. Yes. That's correct.
8	MR. SELDIN: Object to form.	8	Q. And is it your opinion that the
9	THE WITNESS: The lack of studies that	9	Just backing up.
10	demonstrate that.	10	If is it your opinion that medical

	Page 118		Page 119
1	The time is 1:06 p.m.	1	A. You did.
2	We are back on the record.	2	Q. And it's your understanding that this
3	BY MR. RAMER:	3	statement had come from a staffer; correct?
4	Q. Dr. Olson-Kennedy, the document marked as	4	A. I had heard that. I have no idea who the
5	Olson-Kennedy Exhibit 12 is a New York Times article	5	statement came from, except from these authors at the
6	entitled "Biden Administration Opposes Surgery for	6	New York Times.
7	Transgender Minors"; correct?	7	Q. And where did you hear that it came from a
8	A. Yes.	8	staffer?
9	Q. And you've seen this article before;	9	A. I don't remember.
10	correct?	10	I was trying to figure out where I could
11	A. I have.	11	even see this, and I couldn't find it. And I saw a
12	Q. And the first sentence below the you had	12	lot of speculation online, so I have no idea.
13	been granted access, starts with "the Biden	13	And the speculation was that it came from a
14	Administration."	14	staffer. I don't really actually know what it means
15	Do you see that?	15	when something comes from an administration. I think
16	A. I do.	16	that's a very vague comment.
17	Q. And I'm going to read that sentence first	17	Q. That's a fair point.
18	and ask whether I read it correctly.	18	And so the assertion that it came from a
19	It says:	19	staffer, you were saying was something that you saw
20	"The Biden Administration said this week	20	online; is that right?
21	that it opposed gender-affirming surgery for minors,	21	A. Yes.
22	the most explicit statement to date on the subject	22	Q. Are you familiar with Dr. Jack Turban?
23	from a president who has been a staunch supporter of	23	A. I I know Jack.
24	transgender rights."	24	Q. Do you know him well?
25	Did I read that correctly?	25	A. I don't know about well. I mean, we're

	Page 122		Page 123
1	BY MR. RAMER:	1	Darlene Tando were speaking?
2	Q. And on page 11, toward the bottom of the	2	A. Well, we speak together frequently. We do
3	page, you see there's a paragraph that begins	3	trainings together.
4	"Dr. Helen Webberley."	4	Q. Do you recall Dr. Helen Webberley attending
5	Do you see that?	5	one of your trainings?
6	A. Yes.	6	A. Not really.
7	Q. And the second sentence starts with "I'd	7	Q. And continuing with this paragraph, it says:
8	love to talk to you."	8	"In jest, I've said it before, I say it
9	Do you see that?	9	again. So inspirational, you know, absolutely.
10	A. Yes.	10	"And so you said a couple of things, but if
11	Q. And it says:	11	I was wanting to, if I was rewriting the rule book
12	"I'd love to talk to you all day, but we	12	for transgender care, I think, you know, they've
13	haven't got all day, but Marianne and Abby and I	13	coined it, and you've added to it today.
14	went over to Los Angeles to listen to Johanna	14	"And basically Johanna has just said, look,
15	Olson-Kennedy, and Aiden and Darlene Tando to talk."	15	if your kid if your kid tells you that they're
16	Did I read that correctly?	16	trans, they most likely are. Just believe it."
17	A. Yes.	17	Did I read that correctly?
18	Q. And who is Aiden?	18	A. You did.
19	A. I'm assuming that she's talking about my	19	Q. Is that something you said?
20	husband.	20	A. It could've been something I said. I don't
21	Q. And who is Darlene Tando?	21	remember this time specifically, but yes.
22	A. She is a therapist in San Diego that works	22	Q. That's something you believe, though?
23	with transgender young people and their families.	23	A. Yes.
24	Q. And what event is it that Dr. Helen	24	Q. And next paragraph below that, there's an
25	Webberley would have attended where you, Aiden and	25	answer from Dr. Jack Turban. And I'll just read the

2	first two sentences of that. It says: "Yeah, I was really talking around it and	2	gatekeeping. But I don't think that's true because I
2	first two sentences of that. It says: "Yeah, I was really talking around it and not naming names, but that model does exist in the	2 3	gatekeeping. But I don't think that's true because I don't follow either of those models.
2 3 4	first two sentences of that. It says: "Yeah, I was really talking around it and not naming names, but that model does exist in the U.S., right? So Dr. Olson, that's her model."	2 3 4	gatekeeping. But I don't think that's true because I don't follow either of those models. I think that there is a model where an
2 3 4 5	first two sentences of that. It says: "Yeah, I was really talking around it and not naming names, but that model does exist in the U.S., right? So Dr. Olson, that's her model." Did I read that correctly?	2 3 4 5	gatekeeping. But I don't think that's true because I don't follow either of those models. I think that there is a model where an assessment happens, and recommendations are made
2 3 4 5 6	first two sentences of that. It says: "Yeah, I was really talking around it and not naming names, but that model does exist in the U.S., right? So Dr. Olson, that's her model." Did I read that correctly? A. You did.	2 3 4 5 6	gatekeeping. But I don't think that's true because I don't follow either of those models. I think that there is a model where an assessment happens, and recommendations are made based on that assessment.
2 3 4 5 6 7	first two sentences of that. It says: "Yeah, I was really talking around it and not naming names, but that model does exist in the U.S., right? So Dr. Olson, that's her model." Did I read that correctly? A. You did. Q. In an Informed Consent model of care, so	2 3 4 5 6 7	gatekeeping. But I don't think that's true because I don't follow either of those models. I think that there is a model where an assessment happens, and recommendations are made based on that assessment. So I think that I think of a gatekeeper
2 3 4 5 6 7 8	first two sentences of that. It says: "Yeah, I was really talking around it and not naming names, but that model does exist in the U.S., right? So Dr. Olson, that's her model." Did I read that correctly? A. You did. Q. In an Informed Consent model of care, so long as the patient provides Informed Consent for an	2 3 4 5 6 7 8	gatekeeping. But I don't think that's true because I don't follow either of those models. I think that there is a model where an assessment happens, and recommendations are made based on that assessment. So I think that I think of a gatekeeper model more as like the mental health provider that
2 3 4 5 6 7 8 9	first two sentences of that. It says: "Yeah, I was really talking around it and not naming names, but that model does exist in the U.S., right? So Dr. Olson, that's her model." Did I read that correctly? A. You did. Q. In an Informed Consent model of care, so long as the patient provides Informed Consent for an intervention, the provider will provide that	2 3 4 5 6 7 8	gatekeeping. But I don't think that's true because I don't follow either of those models. I think that there is a model where an assessment happens, and recommendations are made based on that assessment. So I think that I think of a gatekeeper
2 3 4 5 6 7 8 9	first two sentences of that. It says: "Yeah, I was really talking around it and not naming names, but that model does exist in the U.S., right? So Dr. Olson, that's her model." Did I read that correctly? A. You did. Q. In an Informed Consent model of care, so long as the patient provides Informed Consent for an intervention, the provider will provide that intervention; correct?	2 3 4 5 6 7 8 9	gatekeeping. But I don't think that's true because I don't follow either of those models. I think that there is a model where an assessment happens, and recommendations are made based on that assessment. So I think that I think of a gatekeeper model more as like the mental health provider that you're working with can keep somebody from getting care.
2 3 4 5 6 7 8 9 10	first two sentences of that. It says: "Yeah, I was really talking around it and not naming names, but that model does exist in the U.S., right? So Dr. Olson, that's her model." Did I read that correctly? A. You did. Q. In an Informed Consent model of care, so long as the patient provides Informed Consent for an intervention, the provider will provide that intervention; correct? MR. SELDIN: Object to form.	2 3 4 5 6 7 8 9 10	gatekeeping. But I don't think that's true because I don't follow either of those models. I think that there is a model where an assessment happens, and recommendations are made based on that assessment. So I think that I think of a gatekeeper model more as like the mental health provider that you're working with can keep somebody from getting care. That feels really different to me than, oh,
2 3 4 5 6 7 8 9 10 11	first two sentences of that. It says: "Yeah, I was really talking around it and not naming names, but that model does exist in the U.S., right? So Dr. Olson, that's her model." Did I read that correctly? A. You did. Q. In an Informed Consent model of care, so long as the patient provides Informed Consent for an intervention, the provider will provide that intervention; correct? MR. SELDIN: Object to form. THE WITNESS: Yes.	2 3 4 5 6 7 8 9 10 11	gatekeeping. But I don't think that's true because I don't follow either of those models. I think that there is a model where an assessment happens, and recommendations are made based on that assessment. So I think that I think of a gatekeeper model more as like the mental health provider that you're working with can keep somebody from getting care. That feels really different to me than, oh, you're assessing somebody, and then you're making a
2 3 4 5 6 7 8 9 10 11 12 13	first two sentences of that. It says: "Yeah, I was really talking around it and not naming names, but that model does exist in the U.S., right? So Dr. Olson, that's her model." Did I read that correctly? A. You did. Q. In an Informed Consent model of care, so long as the patient provides Informed Consent for an intervention, the provider will provide that intervention; correct? MR. SELDIN: Object to form. THE WITNESS: Yes. BY MR. RAMER:	2 3 4 5 6 7 8 9 10 11 12 13	gatekeeping. But I don't think that's true because I don't follow either of those models. I think that there is a model where an assessment happens, and recommendations are made based on that assessment. So I think that I think of a gatekeeper model more as like the mental health provider that you're working with can keep somebody from getting care. That feels really different to me than, oh, you're assessing somebody, and then you're making a recommendation based on what you've gleaned from that
2 3 4 5 6 7 8 9 10 11 12 13 14	first two sentences of that. It says: "Yeah, I was really talking around it and not naming names, but that model does exist in the U.S., right? So Dr. Olson, that's her model." Did I read that correctly? A. You did. Q. In an Informed Consent model of care, so long as the patient provides Informed Consent for an intervention, the provider will provide that intervention; correct? MR. SELDIN: Object to form. THE WITNESS: Yes. BY MR. RAMER: Q. And in a gatekeeping model, there may be	2 3 4 5 6 7 8 9 10 11 12 13	gatekeeping. But I don't think that's true because I don't follow either of those models. I think that there is a model where an assessment happens, and recommendations are made based on that assessment. So I think that I think of a gatekeeper model more as like the mental health provider that you're working with can keep somebody from getting care. That feels really different to me than, oh, you're assessing somebody, and then you're making a recommendation based on what you've gleaned from that assessment.
2 3 4 5 6 7 8 9 10 11 12 13 14 15	first two sentences of that. It says: "Yeah, I was really talking around it and not naming names, but that model does exist in the U.S., right? So Dr. Olson, that's her model." Did I read that correctly? A. You did. Q. In an Informed Consent model of care, so long as the patient provides Informed Consent for an intervention, the provider will provide that intervention; correct? MR. SELDIN: Object to form. THE WITNESS: Yes. BY MR. RAMER: Q. And in a gatekeeping model, there may be times where a patient can provide Informed Consent,	2 3 4 5 6 7 8 9 10 11 12 13 14	gatekeeping. But I don't think that's true because I don't follow either of those models. I think that there is a model where an assessment happens, and recommendations are made based on that assessment. So I think that I think of a gatekeeper model more as like the mental health provider that you're working with can keep somebody from getting care. That feels really different to me than, oh, you're assessing somebody, and then you're making a recommendation based on what you've gleaned from that assessment. Assessment, assessments, that's, in my in
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	first two sentences of that. It says: "Yeah, I was really talking around it and not naming names, but that model does exist in the U.S., right? So Dr. Olson, that's her model." Did I read that correctly? A. You did. Q. In an Informed Consent model of care, so long as the patient provides Informed Consent for an intervention, the provider will provide that intervention; correct? MR. SELDIN: Object to form. THE WITNESS: Yes. BY MR. RAMER: Q. And in a gatekeeping model, there may be times where a patient can provide Informed Consent, but the provider will determine that the patient is	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	gatekeeping. But I don't think that's true because I don't follow either of those models. I think that there is a model where an assessment happens, and recommendations are made based on that assessment. So I think that I think of a gatekeeper model more as like the mental health provider that you're working with can keep somebody from getting care. That feels really different to me than, oh, you're assessing somebody, and then you're making a recommendation based on what you've gleaned from that assessment. Assessment, assessments, that's, in my in my model, that's what we utilize.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	first two sentences of that. It says: "Yeah, I was really talking around it and not naming names, but that model does exist in the U.S., right? So Dr. Olson, that's her model." Did I read that correctly? A. You did. Q. In an Informed Consent model of care, so long as the patient provides Informed Consent for an intervention, the provider will provide that intervention; correct? MR. SELDIN: Object to form. THE WITNESS: Yes. BY MR. RAMER: Q. And in a gatekeeping model, there may be times where a patient can provide Informed Consent, but the provider will determine that the patient is not a good candidate for a particular intervention;	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	gatekeeping. But I don't think that's true because I don't follow either of those models. I think that there is a model where an assessment happens, and recommendations are made based on that assessment. So I think that I think of a gatekeeper model more as like the mental health provider that you're working with can keep somebody from getting care. That feels really different to me than, oh, you're assessing somebody, and then you're making a recommendation based on what you've gleaned from that assessment. Assessment, assessments, that's, in my in my model, that's what we utilize. Q. What's a situation where a patient could
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	first two sentences of that. It says: "Yeah, I was really talking around it and not naming names, but that model does exist in the U.S., right? So Dr. Olson, that's her model." Did I read that correctly? A. You did. Q. In an Informed Consent model of care, so long as the patient provides Informed Consent for an intervention, the provider will provide that intervention; correct? MR. SELDIN: Object to form. THE WITNESS: Yes. BY MR. RAMER: Q. And in a gatekeeping model, there may be times where a patient can provide Informed Consent, but the provider will determine that the patient is not a good candidate for a particular intervention; correct?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	gatekeeping. But I don't think that's true because I don't follow either of those models. I think that there is a model where an assessment happens, and recommendations are made based on that assessment. So I think that I think of a gatekeeper model more as like the mental health provider that you're working with can keep somebody from getting care. That feels really different to me than, oh, you're assessing somebody, and then you're making a recommendation based on what you've gleaned from that assessment. Assessment, assessments, that's, in my in my model, that's what we utilize. Q. What's a situation where a patient could provide Informed Consent or informed ascent, but you
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	first two sentences of that. It says: "Yeah, I was really talking around it and not naming names, but that model does exist in the U.S., right? So Dr. Olson, that's her model." Did I read that correctly? A. You did. Q. In an Informed Consent model of care, so long as the patient provides Informed Consent for an intervention, the provider will provide that intervention; correct? MR. SELDIN: Object to form. THE WITNESS: Yes. BY MR. RAMER: Q. And in a gatekeeping model, there may be times where a patient can provide Informed Consent, but the provider will determine that the patient is not a good candidate for a particular intervention; correct? MR. SELDIN: Object to form.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	gatekeeping. But I don't think that's true because I don't follow either of those models. I think that there is a model where an assessment happens, and recommendations are made based on that assessment. So I think that I think of a gatekeeper model more as like the mental health provider that you're working with can keep somebody from getting care. That feels really different to me than, oh, you're assessing somebody, and then you're making a recommendation based on what you've gleaned from that assessment. Assessment, assessments, that's, in my in my model, that's what we utilize. Q. What's a situation where a patient could provide Informed Consent or informed ascent, but you would deny the intervention based on the assessment?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	first two sentences of that. It says: "Yeah, I was really talking around it and not naming names, but that model does exist in the U.S., right? So Dr. Olson, that's her model." Did I read that correctly? A. You did. Q. In an Informed Consent model of care, so long as the patient provides Informed Consent for an intervention, the provider will provide that intervention; correct? MR. SELDIN: Object to form. THE WITNESS: Yes. BY MR. RAMER: Q. And in a gatekeeping model, there may be times where a patient can provide Informed Consent, but the provider will determine that the patient is not a good candidate for a particular intervention; correct? MR. SELDIN: Object to form. THE WITNESS: I actually think that can	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	gatekeeping. But I don't think that's true because I don't follow either of those models. I think that there is a model where an assessment happens, and recommendations are made based on that assessment. So I think that I think of a gatekeeper model more as like the mental health provider that you're working with can keep somebody from getting care. That feels really different to me than, oh, you're assessing somebody, and then you're making a recommendation based on what you've gleaned from that assessment. Assessment, assessments, that's, in my in my model, that's what we utilize. Q. What's a situation where a patient could provide Informed Consent or informed ascent, but you would deny the intervention based on the assessment? MR. SELDIN: Object to form.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	first two sentences of that. It says: "Yeah, I was really talking around it and not naming names, but that model does exist in the U.S., right? So Dr. Olson, that's her model." Did I read that correctly? A. You did. Q. In an Informed Consent model of care, so long as the patient provides Informed Consent for an intervention, the provider will provide that intervention; correct? MR. SELDIN: Object to form. THE WITNESS: Yes. BY MR. RAMER: Q. And in a gatekeeping model, there may be times where a patient can provide Informed Consent, but the provider will determine that the patient is not a good candidate for a particular intervention; correct? MR. SELDIN: Object to form. THE WITNESS: I actually think that can happen in an Informed Consent model, too.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	gatekeeping. But I don't think that's true because I don't follow either of those models. I think that there is a model where an assessment happens, and recommendations are made based on that assessment. So I think that I think of a gatekeeper model more as like the mental health provider that you're working with can keep somebody from getting care. That feels really different to me than, oh, you're assessing somebody, and then you're making a recommendation based on what you've gleaned from that assessment. Assessment, assessments, that's, in my in my model, that's what we utilize. Q. What's a situation where a patient could provide Informed Consent or informed ascent, but you would deny the intervention based on the assessment? MR. SELDIN: Object to form. THE WITNESS: I think this goes back to what
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	first two sentences of that. It says: "Yeah, I was really talking around it and not naming names, but that model does exist in the U.S., right? So Dr. Olson, that's her model." Did I read that correctly? A. You did. Q. In an Informed Consent model of care, so long as the patient provides Informed Consent for an intervention, the provider will provide that intervention; correct? MR. SELDIN: Object to form. THE WITNESS: Yes. BY MR. RAMER: Q. And in a gatekeeping model, there may be times where a patient can provide Informed Consent, but the provider will determine that the patient is not a good candidate for a particular intervention; correct? MR. SELDIN: Object to form. THE WITNESS: I actually think that can happen in an Informed Consent model, too. BY MR. RAMER:	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	gatekeeping. But I don't think that's true because I don't follow either of those models. I think that there is a model where an assessment happens, and recommendations are made based on that assessment. So I think that I think of a gatekeeper model more as like the mental health provider that you're working with can keep somebody from getting care. That feels really different to me than, oh, you're assessing somebody, and then you're making a recommendation based on what you've gleaned from that assessment. Assessment, assessments, that's, in my in my model, that's what we utilize. Q. What's a situation where a patient could provide Informed Consent or informed ascent, but you would deny the intervention based on the assessment? MR. SELDIN: Object to form. THE WITNESS: I think this goes back to what I was saying before, that if somebody thinks, for

Q. But a person who misunderstands what the intervention actually does is not capable of providing Informed Consent; right?

A. Well, I think it's important here to remember that Informed Consent models are really about adult care. There aren't adolescent Informed Consent models, 'cause they can't legally provide Informed Consent related to gender care.

Their parent or guardian has to do that. They also sign the consent form, but that's not

- Q. When you say "that's not legal," you mean that doesn't establish legal consent. Is that what you're saying?
 - A. Correct.
- Q. And is there ever a situation where a minor could provide informed ascent, the parent or caretaker could provide Informed Consent, but you would deny the intervention based on an assessment?
 - A. Yes.
- Q. And what examples can you give me?
- 24 A. It's rare. Let me try to see if I can think 25 of some examples.

Somebody could, for example, have a preexisting condition that might make the decision to take hormones problematic.

I think that there are some times when people cannot tolerate all the mechanisms of -- any of the mechanisms of delivery, might be really problematic.

I think sometimes people can't afford the interventions if they're not covered by their insurance.

There's probably others.

- Q. In the context of somebody with a preexisting condition that would have a negative interaction with hormones --
 - A. Mm-hmm.
 - Q. -- for example, what if the patient said, I completely understand all of this, but the distress I'm experiencing from my gender incongruence is so severe, that to me it is worth the risk, would you still deny the intervention?

MR. SELDIN: Object to form.

22 THE WITNESS: I think it depends on what the 23 risk is.

24 BY MR. RAMER:

Q. What's an example of a risk where you would

Page 129

Page 128

their risk of blood clots.

But there are some situations where medically you either have to sort things out first, or you -- there's nothing you can do.

BY MR. RAMER:

Q. You can't provide them psychotherapy?

A. Well, you can, but almost everybody gets psychotherapy anyway.

Q. And --

A. Does that resolve their gender dysphoria?

Q. What happens to them if they cannot obtain medical interventions but receive psychotherapy?

A. Well, it's only happened once in my clinic.

One time with somebody with androgen sensitivity syndrome. And I never saw them after the first visit, because medical interventions were off the table for them. That person could go on to get chest surgery, and that would probably significantly help their gender dysphoria, at least to have a flat chest.

- Q. So what do you think Dr. Turban is talking about when he says to Dr. Olson, "That's her model"?
- A. I -- I have no idea what he's talking about.
- Q. And are you familiar with the gender clinic

deny the intervention?

A. Like if somebody had a -- for example, a clotting disorder. Let's say they had a hypercoagulable situation where they had the experience of blood clots, and they wanted to take estrogen. This has been a time when we've denied

Q. So how do you treat that person?

A. Well, usually what we would do is put them maybe on an antiandrogen, something that would still, for example, support their bone density but wouldn't necessarily feminize their bodies.

There's been a -- there was a situation with a patient that I had with androgen insensitivity syndrome.

Well, would -- how are we going to masculinize that person? We just can't, because they have no androgen receptors. Testosterone is going to be ineffective in their body. And so we would not give them interventions.

Those are just a few examples.

For people with coagu- -- coagulation issues, we work with the hematologist to figure out if there are ways. Maybe that person goes on Heparin or some kind of other blood thinner that minimizes

	_		
1	BY MR. RAMER:	1	I didn't know if there was a formal process
2	Q. And so it's your opinion that these medical	2	where the AAP said, let's look through the SOC 8 and
3	organizations have endorsed the WPATH SOC; is that	3	do whatever the word was that you described it.
4	right?	4	MR. SELDIN: And, Mr. Ramer, I'm sorry to
5	A. With the colloquial meaning of "endorse,"	5	interrupt.
6	yes.	6	I'll just note for the record that these two
7	Q. And you're a member of the American Academy	7	lists are slightly different in terms of what's
8	of Pediatrics; correct?	8	included and what's not.
9	A. I am.	9	I know you read them out, but just
10	Q. Were you involved with AAP's review of the	10	(Reporter clarification.)
11	WPATH Standards of Care 8?	11	MR. SELDIN: I apologize.
12	A. No.	12	I'm just noting for the record that
13	Q. Do you know who was?	13	Mr. Ramer read out the different lists of medical
14	A. No.	14	organizations across the declarations. I don't
15	Q. You don't know whether Jason Rafferty was	15	believe they're exactly identical.
16	involved?	16	THE WITNESS: I think it might just be in
17	A. Yes. I that I didn't know that that	17	just a different order.
18	was the specific thing that he did.	18	MR. SELDIN: American Academy of Pediatrics.
19	Q. Are there any other names that were involved	19	MR. RAMER: Got it. Thank you.
20	that you know of?	20	MR. SELDIN: Not to be that guy, but
21	A. I didn't actually even know that happened.	21	MR. RAMER: We're lawyers, we all have to
22	What I know is that Jason wrote something	22	be.
23	about it. But I don't I didn't know that there	23	Q. And do you know Jason Rafferty?
24	was a formal process where the AA that's what I	24	A. I do.
25	mean by "endorsement."	25	Q. Have you worked with him?
	Page 136		Page 137
1	A. I have not.	1	A. I have no memory of that.
2	Q. Have you ever discussed the use of puberty	2	Q. And what was the substance of your
3	blockers as a treatment for gender dysphoria with a	3	presentation?
4	representative from a pharmaceutical company?	4	A. Transgender Care 101.
5	A. Yes.	5	Q. And Endo Pharmaceuticals develops drugs that
6	MR. SELDIN: Object to	6	are used as puberty blockers; correct?
7	THE WITNESS: Oh.	7	A. Yes.
8	MR. SELDIN: Object to form.	8	Q. And apart from the presentation that you
9	You can answer.	9	gave, you have never spoken about the use of puberty
10	THE WITNESS: Yes, I have.	10	blockers as a treatment for gender dysphoria with any
11	BY MR. RAMER:	11	other representative of the pharmaceutical company;
12	Q. Which company?	12	is that correct?
13	A. Endo Pharmaceuticals.	13	MR. SELDIN: Object to form.
14	Q. And what was the context of that discussion?	14	THE WITNESS: Many years ago, I discussed
15	A. Endo Pharmaceuticals asked me to come and	15	the possibility of Endo Pharmaceuticals sponsoring a
16	give a presentation to their reps. I actually don't	16	study so that we could get FDA approval specifically
17	remember who the audience was, but it was	17	for gender dysphoria.
18	educational.	18	That's the only contact I've had with them.
19	Q. Did you get paid for that?	19	BY MR. RAMER:
20	A. I did.	20	Q. What about any other pharmaceutical
21	Q. Do you recall how much?	21	companies?
22	A. No. It's a really long time ago.	22	A. I don't think so. Not that I can remember
23	Q. And do you know Dr. Kara Connelly?	23	offhand.
24	A. I do.	24	Q. And what was the result of the attempt to
25	Q. Was she at that event?	25	get Endo to sponsor the study for FDA approval?

	Page 138		Page 139
1		1	_
1 2	A. They did not want to sponsor a study for the	1 2	was not about gender-forming hormones. It was just about blockers.
3	FDA approval. Q. Do you recall why?	3	Q. And, Dr. Olson-Kennedy, I think that's all
4	A. They said that they did not want to tolerate	4	the questions that I have for now.
5	the bad press.	5	And so I'll turn it over to pass the
6	Q. Do you think that is a good reason for not	6	witness.
7	sponsoring a study?	7	MR. SELDIN: Thank you.
8	MR. SELDIN: Object to form.	8	I suspect that I have nothing, but if you'll
9	THE WITNESS: A hundred percent no.	9	give me five minutes.
10	BY MR. RAMER:	10	MR. RAMER: Absolutely.
11	Q. And have you tried to persuade Endo	11	THE VIDEOGRAPHER: Off the record then?
12	Pharmaceuticals since then, or any other	12	MR. RAMER: Yes.
13	pharmaceutical company, to sponsor a study to get	13	THE VIDEOGRAPHER: The time is 1:30 p.m.
14	FDA approval for puberty blockers?	14	We are now off the record.
15	A. No, not that I recall.	15	(Off record.)
16	Q. Going from puberty blockers to cross-sex	16	THE VIDEOGRAPHER: One moment, please.
17	hormones, have you ever discussed the use of	17	The time is 1:32 [sic] p.m.
18	cross-sex hormones as a treatment for gender	18	We are back on the record.
19	dysphoria in minors with a representative from a	19	MR. SELDIN: Counsel for plaintiffs does not
20	pharmaceutical company?	20	have any questions for Dr. Olson-Kennedy, but we will
21	A. The same thing that I just talked about,	21	read and sign.
22	Endo Pharmaceuticals.	22	MR. RAMER: And thank you very much for your
23	Q. The presentation and then the attempt to get	23	time today, Dr. Olson-Kennedy.
24	the study; is that right?	24	THE WITNESS: You're welcome.
25	A. Mm-hmm. But the attempt to get the study	25	THE VIDEOGRAPHER: One moment, please, and
	Page 140		Page 141
1	I'll take us off the record.	1	
2	This concludes today's videotaped deposition	2	DECLARATION UNDER PENALTY OF PERJURY
3	of Johanna Olson-Kennedy.	3	
4	The time is 1:31 p.m.	4	I, JOHANNA OLSON-KENNEDY, M.D., do hereby
5	We are now off the record.	5	certify under penalty of perjury that I have read the
6	THE REPORTER: Mr. Seldin, are you ordering	6 7	foregoing transcript of my deposition taken on October 7, 2024; that I have made such corrections as
7	a copy of the transcript?	8	appear noted herein in ink, initialed by me; that my
8	MR. SELDIN: Yes. Thank you.	9	testimony as contained herein, as corrected, is true
9	THE VIDEOGRAPHER: And will you need video?	10	and correct.
10	MR. SELDIN: Yes, please. I'll have what	11	
11	he's having.	12	DATED this day of, 20,
12	THE REPORTER: Just to be clear, you want it	13	at, California.
13	expedited also?	14	
14	MR. SELDIN: Yes. Whenever they're getting	15	
15	theirs, I would like it as well.	16	
16	Thank you.	17
